

## PUBLIC WATER SUPPLY DISTRICT NO. 4

### Automated Calling System:

The District implemented automated calling system in January 2012 in an effort to reduce the cost in postage and office supplies to the District. The District has purchased an automated calling system to notify customers of **water line repair, boil advisories, and disconnection purposes.**

In an effort to have the system run at 100% the Water District will need a current phone number on account at all times. It is the customer's responsibility to advise the District of any changes in your account information.

The call will still come from the Water District; it will state your name and your address on account then will follow by message specifically for your account. It will attempt all phone numbers on account.

If you have any other question's regarding the automated calling system, please contact the office.
